

Software Development Team Lead

Join the winning team. Since 1989 CTI has maintained an excellent track record and growing footprint across America, Hong Kong, Singapore, Vietnam, India, Brisbane, and Sydney. We help to solve complex business and technical problems while delivering high quality services to clients across industries, including financial services, insurance and pharmaceuticals.

We seek out cutting edge opportunities for our consultants who deliver IT consulting, business process design, systems integration, and application design and management solutions for companies around the world.

We have opening for a software development team lead to provide our service to Banking, Entertainment, and Financial Services clients.

Responsibilities

- Responsible for the whole life cycle of project development, including requirement gathering, design, development, testing, implementation and production support.
- Lead technical teams through all phases of the Software Development Life Cycle by working closely with managers and other key members of the software development team in order to deliver high quality code during design, development and project deployment.
- Participate in business user meetings to gather requirements, and prepare use case scenarios. Perform software design, development, and testing.
- Define and gather functional requirements for end users.
- Provide on-going application support to end-users.
- Produce standard project documentation as specified by client.
- Participate in code walk-through.
- Work on cross-functional teams in conjunction with client managers and technical architects while communicating issues, providing estimates and developing creative solutions to address technical challenges.
- Work in a collaborative environment to develop applications with a strong focus on Java/J2EE design patterns, Oracle PL/SQL, Amazon Web Services (AWS), Hadoop, HIVE, in order to facilitate database design, back-end architectural patterns and front-end development techniques. Work closely with database architect on database design.
- Lead and collaborate with Cosatech offshore development team on client projects.

Minimum Requirements

Bachelor's degree (Computer Science, Computer Information Systems, Engineering, or related) plus 5 years of progressively-responsible software development experience with at least 5 years of experience in Java, J2EE, Oracle, PL/SQL, ASP .Net, Web Methods web services and AWK shell scripting.

As equivalent, employer will accept a Master's degree (Computer Science, Computer Information Systems, Engineering, or related) plus 3 years of progressively-responsible software development experience with at least 3 years of experience in Java, J2EE, Oracle, PL/SQL, ASP .Net, Web Methods web services and AWK shell scripting.

Email resume/CV and contact information to lanny.nguyen. No phone calls please.

**Work is at unanticipated project sites within the Chicagoland metropolitan statistical area. Telecommuting is permitted up to two times per week, only if the client project permits telecommuting. Must reside within commuting distance from company headquarters located at 1415 W. 22nd Street, Oak Brook, IL 60523. No travel is involved.
